\*Math and Science requirements in major also fulfill core requirements; MATH 155 and MATH 156 are prerequisites for MATH 207.

Year 4 at the University of Dayton or the University of Akron may start with courses in summer following the Walsh junior year. The summer, fall and spring of year 4 will be at the University of Dayton or the University of Akron. Total credits at UD or UA, including summer, fall and spring for year 4 will be 25 credit hours of engineering courses.

The first 3 years at Walsh will include the first page of this curriculum sheet as well as the majority of the general education curriculum. It may require some summer courses to complete this major in the 3 + 2 window. Check with your advisor for details.

At the end of the spring semester in year 4, the BS in Biology from Walsh will have been earned and you will graduate from Walsh. You will then need to apply to the UD or UA Master's program (see advisor for details) to complete the 5th year at UD or UA. Once accepted into the UD or UA Master's program, you will complete summer, fall and spring courses at UD or UA (and thesis work if chosen) to finish an MS in Bioengineering from UD or UA in the spring of year 5.

During year 4, the Walsh pre-engineering student will have both a Walsh and a UD or UA advisor. Special considerations will be made to work with athletes and honors students.

The exact courses involved in this program are subject to change between 2017-2020 as we optimize this new process. All changes will benefit students enrolled.
